

Arden Energy Fuel Mix

Sustainability is at the core of Arden Energy’s offering. We believe the most sustainable energy is the energy you don’t use and help our customers prioritise energy efficiency and waste avoidance. We strongly support self-generation of renewable energy and local production of renewable energy.

The following table summarises our Fuel Mix, for customers not availing of a Green Source Product, for 2023 being the latest year verified by the CRU.

Arden Energy Fuel Mix of Customers Not Availing of a Green Source Product		
Applicable Period: January 2023 to December 2023		
Electricity supplied has been sourced from the following fuels:	% of total	
	Electricity Supplied by Arden Energy	Average for All-Island Market (for comparison)
Renewable	31.7%	61.3%
Gas	54.7%	34.1%
Oil	10.2%	3.5%
Coal	1.6%	0.5%
Other	1.8%	0.6%
Total	100.0%	100%
Environmental Impact		
CO ₂ Emissions	357 gCO ₂ per kWh	219 gCO ₂ per kWh
