

## Arden Energy Fuel Mix

Sustainability is at the core of Arden Energy’s offering. We believe the most sustainable energy is the energy you don’t use and help our customers prioritise energy efficiency and waste avoidance. We strongly support self generation of renewable energy and local production of renewable energy.

The following Table summarises our Fuel Mix for 2021 being the latest year verified by the CRU.

<b>Arden Energy Fuel Mix Disclosure</b>		
<b>Applicable Period: January 2021 to December 2021</b>		
<b>Electricity supplied has been sourced from the following fuels:</b>	<b>% of total</b>	
	<b>Electricity Supplied by Arden Energy</b>	<b>Average for All-Island Market (for comparison)</b>
Renewable	100.0%	55.9%
Coal	0.0%	6.8%
Gas	0.0%	33.6%
Oil	0.0%	2.7%
Other	0.0%	1.0%
Total	100.0%	100%
<b>Environmental Impact</b>		
CO2 Emissions	0 gCO2 per kWh	258 gCO2 per kWh
